

# ASSET MANAGEMENT PRODUCTIVITY ASSESSMENT

## AN INFORMED APPROACH TO ASSET MANAGEMENT

Every physical asset requires maintenance to make the most of your capital investments and reduce risk of failure. From marinas to utilities, your operations depend on the infrastructure you build and maintain. The challenges in asset management – demand for services, increased operating costs and aging facilities – require decisions that result in the best use of your resources. And you want to improve your efficiency in operations through cost-effective asset management solutions. We help you develop and deploy practical asset management strategies for each stage of the asset life cycle.

### ASSET MANAGEMENT PLANNING

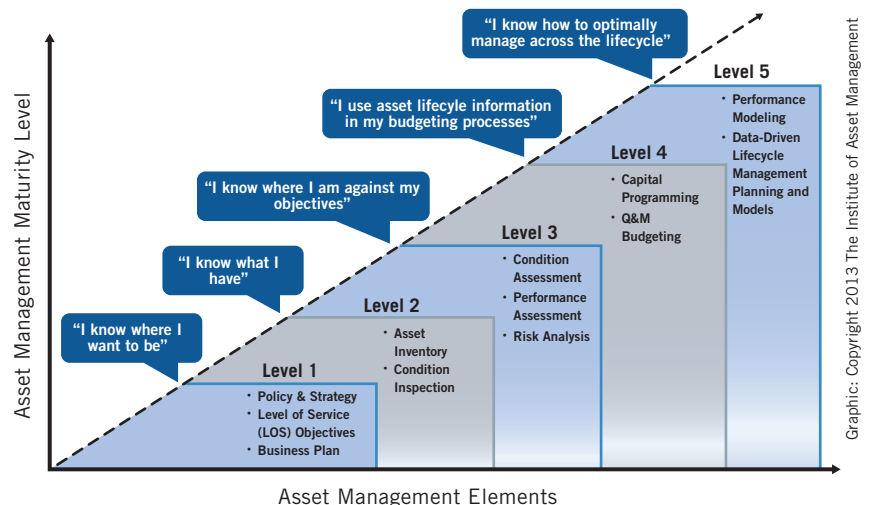

To get where you want to be, to optimally manage your assets with advanced capabilities – first, a few questions you may want to answer:

- Are you up to speed with current asset management best practices?
- Are you taking advantage of the latest asset management capabilities in Cityworks?
- Are you collecting the right data for asset management?

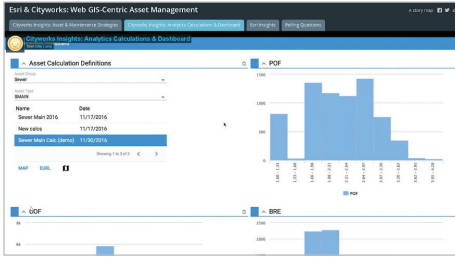

### ASSET MANAGEMENT SOLUTIONS

Are your asset management tools focused on data-driven life cycle planning for optimal performance? These asset-focused tools – **Esri**, **Cityworks**, and **Assetic** use your asset life cycle information to maximize the effectiveness of your asset modeling.

Infrastructure Asset Management Maturity Model

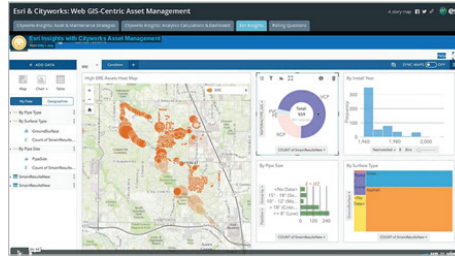

## CITYWORKS INSIGHTS

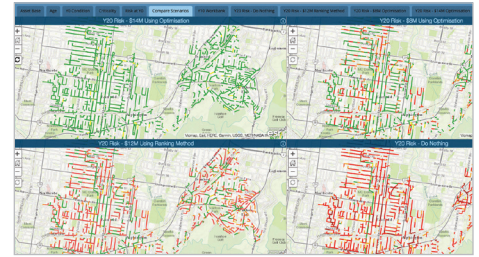

- » Asset Maintenance Strategies
- » Current Asset Health Check Dashboards

## INSIGHTS FOR ArcGIS

- » Asset Maps
- » User Defined Asset-Centric Dashboards

## ASSETIC PREDICTOR

- » Prediction Modeling and Decision Support Tools for Asset Management

## PERFORMANCE OPTIMIZATION

Explore ways to achieve excellence in asset management and optimize the value of your system functionality.

- Cityworks Insights - updated and enhanced to leverage all the power of advanced asset management capabilities.
- How are you using Esri's technology and your current spatial datasets in the context of asset management?
- What are the latest trends in asset management reporting and analysis methods available in Cityworks, Insights for ArcGIS and Assetic?

# LET'S TALK ASSET MANAGEMENT

## POWER ENGINEERS, INC.

A corporate member of the Institute of Asset Management (IAM), the international organization dedicated to life management of physical assets and the application of ISO: 55000, the recognized standard for asset management.

**LOOK TO POWER** – your must-have knowledge partner – to advance your asset management capabilities.

- IAM Certified Professionals
- Over 15 years' experience deploying Cityworks to all types and sizes of organizations
- Integration for complete asset registry (CIS, FMIS, DMS, etc.)

**TAKE THE FIRST STEP.** Contact POWER to arrange for a two-day tactical workshop to kick start your asset management program. This gives you a starting point to plan your organization's abilities to leverage your Cityworks deployment and initiate or refine your asset management procedures, processes and policies.
